GURUPRASAD BALKUNDE

PUNE | +91 9373702955 | guruprasad003b@gmail.com

PROFESSIONAL SUMMARY

Dedicated and results-driven Application Support Engineer with 2.2 years of hands-on experience in enterprise-level banking application support. Proven ability to manage and resolve high-priority production incidents across L1 and L2 support levels, ensuring minimal disruption to critical business operations.

Skilled in end-to-end incident lifecycle management — from detection and triage to root-cause analysis and permanent resolution — using tools such as AppDynamics, JIRA, Salesforce, and Confluence. Experienced in monitoring JVMs, application servers, web servers, and Oracle databases to proactively identify performance bottlenecks before they impact users.

SKILLS

PROFESSIONAL EXPERIENCE

NuSummit | Production Support Engineer **AUG 2026 – PRESENT**

Client: National Stock Exchange of India (NSE) – NEAPS Project

- Provided 24/7 L1 & L2 application support, handling escalated tickets and resolving technical issues to maintain high service availability.
- Managed tickets via ServicNow and ensuring timely updates and accurate documentation of resolution steps.
- Supported end users in resolving transaction-related(OTP,EMAIL), login, and browser compatibility issues.
- Conducted application health checks and monitored daily transactions, server performance, and logs to ensure stable operations.
- Executed Linux commands for log analysis, system automation, and troubleshooting backend issues.

Myclan Services Pvt Ltd. | Application Support Engineer **JULY 2024 – JULY 2026**

Client: Bhandhan Bank – Flexcube Project

- Provided L1 & L2 application support, handling escalated tickets and resolving technical issues to maintain high service availability.
- Performed SQL queries for data extraction, validation, and issue diagnosis in production and UAT environments.

- Collaborated with development and infrastructure teams to perform root-cause analysis (RCA) and implement permanent fixes for recurring issues.
- Managed tickets via Saleforce and ensuring timely updates and accurate documentation of resolution steps.
- Appdynamics for monitoring the application health and performance.
- Monitored 24 JVMs and server/database performance via AppDynamics; raised Severity 1 incidents and communicated status updates to affected teams.
- Created and maintained Confluence knowledge base articles to reduce repeated escalations and support faster on boarding of new team members.
